---

## PRESENT POSITION

- **University of Oslo** **Oslo, Norway**  
*Research Software Engineer at Rosseland Centre for Solar Physics* *2020 – Present*
- 

## EDUCATION

- **Stony Brook University** **Stony Brook, NY**  
*Ph.D. in Physics and Astronomy* *2014 – 2020*
  - **Universidad del Valle de Guatemala** **Guatemala City, Guatemala**  
*Licenciatura en Física and B.Sc. in Physics, magna cum laude* *2008 – 2013*
  - **North Central College** **Naperville, IL**  
*Physics, Global Undergraduate Exchange Program (Global UGRAD)* *Sept. 2009 – June 2010*
- 

## SUMMARY OF RESEARCH

- **University of Oslo** **Oslo, Norway**  
*Research Software Engineer* *September 2020 – Present*
  - Contributes to developing and testing tasks with the Bifrost (rMHD) code used to simulate stellar atmospheres
  - Has updated and developed support of a GPU version of the Bifrost MHD solver to work on different GPUs and compilers. Working on benchmarks, optimization and adding more capabilities.
  - Contributes with testing tasks of the DISPATCH framework for various solvers including stagger and Riemann solvers
  - Use Jenkins with scripted pipelines to enhance the test suite capabilities of various codes. Included customized integration with slack and generating static website with test results. Contributing to a structure that developers can easily add tests to.
- **Stony Brook University** **Stony Brook, NY**  
*Research assistant, supervised by Prof. Michael Zingale* *June 2015 – July 2020*
  - Graduate thesis title "Studies toward modeling of White Dwarf Mergers and Magnetohydrodynamics"
  - Castro developer: involved in the ongoing development of the Castro code, an AMR compressible hydrodynamics code. <https://github.com/AMReX-Astro/Castro>
  - White Dwarf merger studies: using Castro to perform various 3-d simulations of the system.
  - Magnetohydrodynamics (MHD) solver: led the efforts of porting and extending, testing and optimizing an MHD solver in Castro
  - Utilizes yt package for visualization and further analysis
  - Black Widow Pulsar simulation: did exploratory studies with Castro to understand the interaction of the pulsar radiation with its companion star
- **Fermi National Accelerator Laboratory** **Batavia, IL**  
*Intern collaborating on the MINERvA experiment* *April 2013 – April 2014*
  - Quasi-elastic neutrino-nucleon scattering: utilized C++, Python, GENIE, and ROOT to perform an analysis of the differential cross section in  $Q^2$  to acquire the axial mass parameter in a model independent way
  - Inclusive neutrino cross section ratios on different nuclei at MINERvA: utilized C++, Python and ROOT to study how different Monte Carlo models affect the hadronic energy reconstruction and subsequent systematic errors for the ratios
  - Tested the MINERvA 64-channel photomultiplier tubes (PMTs) for light leaks and measured their cross talk

- MINERvA Detector Monitoring Controls: Familiarization with the computers and other electronic devices that monitor and control the detector to become a detector monitoring expert shifter
  - **Hope International Radiotherapy Center** **Guatemala City, Guatemala**  
*Intern* *Feb. 2012 – April 2013*
    - Developed a Monte Carlo simulation of a clinical linear accelerator - Varian 2300 CD, for 6MV energy
    - Installed the BEAMnrc/EGSnrc package and wrote an installation manual for future references
    - Implemented a way to run the simulations in parallel in the computer at the center (Intel Xenon processor) using the network queuing system PBS
    - Internship research and knowledge were turned into undergraduate written thesis and dissertation
- 

## TEACHING EXPERIENCE

- **University of Oslo** **Oslo, Norway**  
*Summer student supervisor* *Summer 2021, 2022*
    - Teach, reinforce computing skills to undergraduate and masters students including: version control, use of servers at the institute, visualization tools.
    - Teach students workflow for two of our scientific codes: compiling, running and analyzing output.
    - Students run verification tests of common setups in the literature for MHD codes, do parameter studies, and report results for different solvers.
    - Students have also built tools for the test suite and analysis including comparison with analytical solutions.
  - **Stony Brook University** **Stony Brook, NY**  
*Women in the Laboratory: Intro. to STEM Research, Project Leader* *Spring 2017*
    - Built, in collaboration with a colleague, an introduction to computational science four week class. This is a program for undergraduate women in science and engineering which gives the students exposure to research carried out at the university
    - Taught and designed lessons using Jupyter python notebooks and provided grades for assignments
  - **Stony Brook University** **Stony Brook, NY**  
*Institute of Advanced Computational Science, IACS computes!* *Summer 2019*
    - Helped during the two week summer camp for high school students, targeted towards teaching Python. Assisted the instructor, with exercises and problems students encounter.
  - **Stony Brook University** **Stony Brook, NY**  
*Physics Department, Teaching Assistant* *2014 – 2016*
    - Graded and helped physics students in the computation for physics and astronomy course
    - Taught engineering and physics students in the recitation section of the introductory physics course
    - Taught life science students in the lab sections of introductory physics courses and graded their activities
  - **Universidad del Valle de Guatemala** **Guatemala City, Guatemala**  
*Computer Science Department, Laboratory Assistant* *Jan. – June 2012*
    - Taught engineering students in the lab section of introductory computer science course and graded their homework
  - **Universidad del Valle de Guatemala** **Guatemala City, Guatemala**  
*Physics Department, Laboratory Assistant* *Jan. – Dec. 2011*
    - Taught engineering students in the lab sections of introductory physics courses and graded their lab reports and activities
- 

## AWARDS AND OTHER ACADEMIC RECOGNITIONS

- Institute for Advanced Computational Science Jr. Researcher Award 2017 - 2019
- SIAM CSE17 Broader Engagement Program February, 2017
  - Awarded with travel support and conference fees by Sustainable Horizons Institute. The program also provides scientific and professional guidance during the meeting and a mentoring program.

- Physics department - Peter B. Kahn Prize 2016
    - Awarded with travel support to attend MESA summer school
  - Academic distinction (Distinción Académica) for high honors in the Physics Department 2008, 2010 – 2012
  - Global Undergraduate Exchange Program Sept. 2009 - June 2010
    - Awarded with one-year, full-time scholarship by the U.S. State Department to study physics at North Central College
-

- 

## LARGE COMPUTER TIME ALLOCATIONS

- Co-Investigator on INCITE 2021 award, Approaching Exascale Models of Astrophysical Explosions (2021: 700 k node hours on OLCF summit; 2022: 590 k node hours on OLCF summit, 100 k node hours on ALCF polaris)
  - Senior Investigator on NERSC 2021 allocation, Three-dimensional studies of white dwarfs, massive stars, and neutron star systems (30 M MPP hours)
  - Senior Investigator on NERSC 2020 allocation, Three-dimensional studies of white dwarfs, massive stars, and neutron star systems (30 M MPP hours)
  - Co-Investigator on INCITE 2019 award at OLCF, Approaching Exascale Models of Astrophysical Explosions (2020: 300 k node hours on summit; 2019: 1.5 M node hours on titan, 105 k node hours on summit)
  - Senior Investigator on NERSC 2019 allocation, Three-dimensional studies of white dwarf and neutron star systems (27.5 M MPP hours)
  - Senior Investigator on NERSC 2018 allocation, Three-dimensional studies of white dwarf and neutron star systems (20.85 M MPP hours)
  - Co-Investigator on INCITE 2018 award at OLCF, Approaching Exascale Models of Astrophysical Explosions (40 Mh)
-

## PROFESSIONAL DEVELOPMENT

- **IHPCSS 2022 returning mentor** **Athens, Greece**  
June 2022  
*XSEDE, PRACE, SciNET, RIKEN*
  - Contributed with mentoring students and activities.
  - Helper of various HPC sessions.
  - Performed similar tasks in the virtual summer school in 2021
- **PRACE autumn school 2021: Harnessing the EuroHPC Flagship Supercomputers** **Vuokatti, Finland**  
October 2021  
*CSC - IT Center for Science*
  - Participated in the hackathon modality of the event with the goal of running and studying the MHD solver of the Bifrost code in LUMI like hardware.
- **Advancing Theoretical Astrophysics summer school** **Amsterdam, Netherlands**  
July 2019  
*University of Amsterdam*
  - The school was two weeks of lectures, exercises and tutorials on the topics relevant for the study of accretion and outflows around compact objects.
- **Argonne Training Program on Extreme-Scale Computing** **St. Charles, IL**  
July 2018  
*Argonne Leadership Computing Facility*
  - The program consisted of two weeks of training in high performance computing, including different computer architectures, numerical algorithms and profiling.
- **ISC High Performance 2018 Student Volunteer Program** **Frankfurt, Germany**  
June 2018  
*ISC Group*
  - Took part of the Student Volunteer Program for the ISC High Performance conference.
- **Software Carpentry Instructor** **Stony Brook, NY**  
April 2018  
*Software Carpentry*
  - Completed the Software Carpentry instructor training program.
- **International HPC 2017 summer school** **Boulder, CO**  
June 2017  
*XSEDE, PRACE, COMPUTE CANADA | CALCUL CANADA, RIKEN*
  - School consisted on lectures with hands-on sessions and advanced mentoring about current technologies in HPC. In addition presented a poster with ongoing research.
- **GPU Hackathon 2017, 2018** **Brookhaven National Laboratory, NY**  
Jun. 2017, Sept. 2018  
*BNL, UD, ORNL, SBU*
  - Received mentoring and Hands-on training towards implementing application (from our research group) or part of it to run on GPUs.
- **MESA summer school** **Santa Barbara, CA**  
August 2016  
*UC Santa Barbara*
  - Lectures followed by extensive hands-on labs designed to learn the use of the stellar evolution code Modules for Experiments in Stellar Astrophysics (MESA)

---

## PRESENTATIONS

- **Astrovisualization, The role of images in Astronomy and Space sciences** **Norrköping, Sweden**  
June 2022  
*Contributed talk*
  - Presented during this symposium on "Observations meet simulations at Rosseland Center of Solar Physics"
- **CNLS Seminar talk at Los Alamos National Laboratory** **Los Alamos, NM**  
October 2019  
*Invited talk*
  - Gave a talk on "Studies towards Modeling of White Dwarf Mergers using Castro"
- **Joint Science Meeting, Tokyo Institute of Technology and Stony Brook University** **Tokyo, Japan**  
May 2019  
*Poster presentation and Invited talk*
  - Gave a talk and poster presentation on "Explorations on White Dwarf Merger simulations with Castro"

- **SIAM CSE19 Meeting** **Spokane, WA**  
*Minisymposium talk* *February 2019*

  - Gave a talk as part of the "Applications of the AMReX Block Structured Adaptive Mesh Refinement Framework" minisymposium. The title of the talk was "CASTRO: A compressible astrophysical hydrodynamics code"
- **233rd AAS Meeting** **Seattle, WA**  
*Poster presentation* *January 2019*

  - Presented poster: Explorations on White Dwarf Merger Simulations with Castro (Maria G. Barrios Sazo, Max Katz, Michael Zingale)
- **Joint Science Meeting, Tokyo Institute of Technology and Stony Brook University** **Stony Brook, NY**  
*Invited talk* *May 2018*

  - Gave a presentation titled MHD studies towards simulating White Dwarf Mergers with Castro
- **Institute for Advanced Computational Science Research Day** **Stony Brook, NY**  
*Invited talk* *April 2018*

  - Presented talk: MHD studies towards simulating White Dwarf Mergers with Castro
- **Astronomy Seminar talk at University of Würzburg** **Würzburg, Germany**  
*Invited seminar talk* *July 2017*

  - Gave a presentation to the astronomy group titled: Simulations of white dwarf mergers and black widow pulsars using Castro
- **SIAM CSE17 Meeting** **Atlanta, GA**  
*Poster presentation* *February 2017*

  - Presented poster as part of the Broader Engagement Minisymposium: Simulating Black Widow Pulsar system with radiation hydrodynamics (Maria G. Barrios Sazo, Michael Zingale, Weiqun Zhang)
  - This contributed towards Best Minisymposium award
- **JINA-CEE Frontiers in Nuclear Astrophysics Meeting** **Lansing, MI**  
*Poster presentation and Junior Workshop Talk* *February 2017*

  - Gave a talk at the junior researcher workshop: Compressible hydrodynamics code, Castro
  - Poster at main meeting: Black Widow Pulsar radiation hydrodynamics simulation using Castro: Methodology (Maria G. Barrios Sazo, Michael Zingale, Weiqun Zhang)
- **229th AAS Meeting** **Grapevine, TX**  
*Poster presentation* *January 2017*

  - Presented poster: Black Widow Pulsar radiation hydrodynamics simulation using Castro: Methodology (Maria G. Barrios Sazo, Michael Zingale, Weiqun Zhang)
- **CURCCAF - Central American and Caribbean Course of Physics** **Guatemala City, Guatemala**  
*Poster presentation* *2012*

  - Presented a poster with the results of a Monte Carlo simulation of a clinical linear accelerator – Varian 2300 CD, for 6MV energy

## PROFESSIONAL SERVICE

- SC22 Reproducibility Challenge Committee 2022

  - Helped with the paper selection for the Reproducibility Challenge in the Student Cluster Competition.
- WISE graduate mentoring program Nov. 2018 – 2019

  - Mentor of two undergraduate physics students who are part of the WISE (women in science and engineering) program.
- Graduate Women in Science and Engineering 2017 – 2019

  - In 2018, Executive Board member of the group as treasurer.

- In 2017, Executive Board member of the group as technical coordinator. Maintained emails including templates and mailing lists; and social media page
  - Blog contributor
  - Physics Dept. Quality of Life Committee 2015 – 2018
    - Discuss with the committee issues seen as a student in regards of improving the quality of life outside of academics. This includes building improvements as well as organizing gatherings
  - IACS Student ambassador 2017
    - Represented the Institute of Advanced Computational Science at two conferences. The duties included working with a team setting up a booth, and encourage potential future graduate students to pursue their goals and consider applying to Stony Brook University.
      - \* Tapia conference in Atlanta, Georgia on September 20 – 23
      - \* SACNAS conference held in Lake City, Utah on October 19 – 20
  - Astronomy Club Secretary 2012 – April 2013
    - Helped staff with observations, seminars, and publicity of talks and events
- 

## OUTREACH

- Women in Astrophysics Blog, Institute of Theoretical Astrophysics 2021
    - contributed with blog entry “Thinking about starts... in light of supercomputers”
  - Astronomy on Tap, Institute of Theoretical Astrophysics 2021
    - contributed with talk about “Musings on the modelling of White Dwarf Mergers”
  - To the stars: Guatemala in Space book 2021
    - contributed and featured as one of 23 Guatemalan scientist working in space related projects, targeting students as the main audience.
  - Stony Brook Astronomy Open Night 2015 – 2016
    - Helped with the observing which happens after a lecture of public interest. This program is offered once a month
  - Fermilab Education Office Sept. 2013 – Apr. 2014
    - Participated in the activity “Ask a Scientist”, organized by the Museum of Science and Industry in Chicago
    - Presented in the Evanston, IL public library for the program “Jugando con la Ciencia” (playing with science)
    - Assisted scientists in classroom presentations offered to local schools
  - Exact Sciences Club - Contributor of first edition of newspaper 2013
    - Wrote a newspaper article - “Introduction to Einstein Relativity: Some Issues About the Luminic Ether”, for the first edition of a newspaper intended to be for the general public
- 

## LANGUAGES

English (fluent verbal and written), Spanish (native verbal and written), German (Goethe Zertifikat B1)

---

## PROGRAMMING LANGUAGES

Python, Fortran, C++, OpenMP, OpenACC, MPI, Java, PHP
